

Code for Berkeley

Code for Berkeley, a Code for America Brigade, aims to build a diverse and inclusive group of volunteers to improve the Berkeley community and government through projects using technology, user-centered design, and data. We want to make government and its services *open, easy, and agile*.

we're not just for coders

By bringing together people with a wide range of skills - including design, coding, policy, and more - we hope to make great products and help each other learn.

stay in touch

We're getting ready to host general meetings for students and the community starting **next semester**. To find out how you can be involved in the future and keep up with our progress in our inaugural semester, sign up for our newsletter and like us on Facebook!
